Web Designer / Video Editor**About Me**

I am a web designer and video editor with experience in both creative and technical projects. I enjoy developing functional, visually appealing applications and websites, as well as crafting video content that tells a compelling story. I am a quick learner, detail-oriented, and thrive in collaborative environments.

Technical Skills**Programming & Web Development:**

- **Languages & Frameworks:** I have experience in Java (Beanly, Ascentra, Sugbo-Aid), TypeScript (admin-ascentra, Invex), JavaScript, HTML, and CSS (portfolio projects).
- **Database & Backend:** I am familiar with basic database integration in Java projects and have practical experience with REST API concepts.
- **Tools & Development:** I use Git & GitHub for version control, and I am proficient with VS Code, Eclipse, and IntelliJ. I apply responsive design principles to ensure websites are mobile-friendly and visually engaging.

Media & Creative:

- I edit videos and craft visual stories for presentations, academic projects, and digital content.
- I plan and develop content with a focus on engagement and clarity.

IT & Technical:

- I hold TESDA NC II Certification in Networking.
- I have strong technical problem-solving skills and adapt quickly to digital tools and new technologies.

Professional Skills:

- Problem-solving and debugging
- Team collaboration and project planning
- Time management and attention to detail
- Communication and adaptability

Professional Experience

Develop Kreativiti – Development Team Member & Video Editor (Startup)

At Develop Kreativiti, I collaborated with a startup team on both creative and technical projects. I designed UI/UX layouts and workflows, helping improve usability across applications. I assisted in creating system architecture and project structure, ensuring scalable and maintainable code. Additionally, I edited and produced video content for presentations and project showcases, and contributed to multimedia planning and execution while working in a team-oriented, deadline-driven environment.

Software Development Projects

Beanly – Coffee POS System (Java)

I developed a fully functional Point of Sale system for a coffee shop, implementing inventory management, sales tracking, and transaction processing. I applied object-oriented programming principles and collaborated using Git.

Sugbo-Aid – Donation Management System (Java)

I built a donation management system to track contributors and generate reports. I designed intuitive user interfaces, implemented data validation, and structured the system for scalability and maintainability.

Ascentra – Administrative Dashboard (Java & TypeScript)

I created a dashboard to manage user data, analytics, and administrative tasks. I improved front-end logic using TypeScript and designed UI/UX layouts to enhance navigation and interaction.

Invex – Web Application Dashboard (TypeScript & JavaScript)

I developed an interactive dashboard with dynamic data visualization, integrated APIs, implemented responsive design, and refactored code for better maintainability.

Shipping Company – Website UI/UX & Layout Design (TypeScript, HTML & CSS)

I contributed to designing the website's user interface and user experience. I applied responsive design principles, ensured accessibility across devices, and collaborated with the team to align visual design with project goals.

Personal Portfolio Website (HTML, CSS, JavaScript)

I built my own portfolio website to showcase academic and personal projects, emphasizing clean layout, smooth navigation, responsive design, and performance optimization.

General Project Skills:

I regularly apply debugging, testing, code refactoring, version control, UI/UX principles, and system architecture planning to deliver stable and maintainable projects.

Education

- University of San Carlos North Campus – Completed Grade School through High School
- University of Southern Philippines Foundation – Completed Senior High School through Fourth Year College

Awards & Certifications

- High Honors, Senior High School
- Top 2 – NSTP Video Presentation (Video Editor)
- Dean's List – 1st, 2nd, and 3rd Year College
- TESDA National Certificate II (NC II) in Networking
