30 Diamond Street Gemsville Lahug, Cebu City

## SUMMARY

Web and app designer with a strong background in UI/UX design, front-end development, and dashboard-based systems, complemented by solid experience in video editing and visual storytelling. Skilled in creating functional, responsive, and visually engaging websites and applications, as well as producing compelling video content for presentations, academic projects, and digital media. Detail-oriented with a strong technical foundation and a collaborative work style, with four years of experience as a Student Department Officer handling graphics design and social media management, supporting departmental branding, events, and digital communication.

## PROJECTS

### Ascentra

Hiking Mobile App Project for capstone

Jan 2024 - Present

- A mobile-based administrative application designed to manage user data, system records, and analytics through a clean and intuitive interface.
- Focuses on efficient workflows, real-time data access, and responsive UI/UX to support administrative and operational tasks.
- Built with scalability and maintainability in mind, applying modern development practices and structured system architecture.

### Beanly

POS Coffee System

Sep 2025 - Present

- A point-of-sale system developed for coffee shops to handle sales transactions, inventory management, and order processing.
- Designed with an intuitive interface to ensure fast and accurate cashier operations and efficient daily sales tracking.
- Built using Java and object-oriented principles, focusing on system reliability and maintainable code structure.

### Sugboaid

Donation management system

Dec 2025 - Present

- Handles donation tracking and distribution
- Organized to help manage contributors and beneficiaries
- Built using Java

## CERTIFICATION

### TESDA National Certificate

Computer Systems Servicing

Sept 2024

- Certified by TESDA in Computer Systems Servicing (NC II), validating competency in computer hardware, software, and networking fundamentals.
- Demonstrated skills in installing, configuring, maintaining, and repairing computer systems and networks, including servers.
- Trained in workplace communication, occupational health and safety, and technical standards for professional IT support roles.

### Introduction to Modern AI

Cisco Networking Academy

Oct 2025

- Gained foundational knowledge of modern artificial intelligence concepts, including machine learning and AI-driven systems.
- Explored practical applications such as chatbots, computer vision, and machine translation.
- Learned effective prompting techniques to improve interaction and output quality of AI models.

## EDUCATION

### Bachelor of Information Technology

Present

University of Southern Philippines Foundation

- Fourth-year BS Information Technology student at the University of Southern Philippines Foundation, currently pursuing On-the-Job Training (OJT).
